# LOGIX®

HIGH PERFORMANCE BUILDINGS

Assisted living operators choose to build with Logix ICF because it's not just a SMART build—it's also a SMART business strategy.
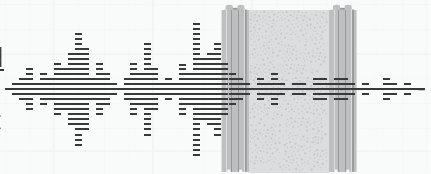

SIX CONSTRUCTION STEPS IN ONE EFFICIENT PACKAGE

1. Concrete
2. Steel Reinforcement
3. Insulation
4. Air Barrier
5. Vapor Barrier
6. Furring Strips

EXCEPTIONAL SOUND-PROOFING

Your occupants will notice <u>and</u> appreciate the additional sound control and privacy that a Logix ICF building provides.

High Performance Advantages

- Logix ICF, with "6 Steps in 1", saves time <u>and</u> money. And a faster build means earlier occupancy and a quicker positive cash flow.
- Logix ICF walls are bullet-proof, and, when hurricane glass is installed, during most storms your occupants can safely remain in the building without having to be moved. That means family members will enjoy peace of mind knowing their loved ones are in a safe and comfortable environment.
- The enhanced living experience of a Logix ICF-built structure provides you with a strategic opportunity to charge a bit more money in return for the added value it offers, while the ongoing savings you'll experience in energy and maintenance expenses will perpetually drop to your bottom line.

Logix is The ICF Solutions Company

Logix provides full-service support and turn-key expertise to designers, GC's and installers to shorten the learning curve and maximize project success. **Over 100 million square feet of Logix ICFs has been successfully installed since 2002.**

- Design Assistance
- Crew-Specific Training & On-site QC
- ICF Advisory Services
